

COMPENSATING PROGRAM

14.09 – 25.09. 2020.

I. Compensating practice work , 1st year students, summer semester:

2 crowns - teeth 24 and 37.

Tooth 24, ‘Adapta system‘, cast in metal, completely finished and polished, buccal surface white wax modeling.

Tooth 37, dipping technique, finished wax modeling.

Post-and-core, tooth 11, cast in metal, adjusted on the model, not polished.

Temporary acrylic resin crown, tooth 11 – white wax modeling over the post-and-core.

II. Compensating practice work, 2nd year students, summer semester:

Teeth arrangement – upper and lower complete denture – to be arranged 2 times.

Dentures wax modeling after second arrangement – the dentures must be completed for flasking.

III. Organization of the working process

1. Attendance of all classes is mandatory.
2. Each group will be divided into two subgroups.
3. Each subgroup of the group should have 4 attendances.
4. Each student **should have a face mask**, gloves and plastic helmets are optional. Students must keep a **safety distance of 1.5 meters** from each other.
5. The compensating program will be completed by practice work assessment.
