

V YEAR - IX (WINTER) SEMESTER 2022/2023 LECTURES SCHEDULE

Friday: From 08.00 to 09.30, 1 week III Dent. Hall

DATE	THEME
30.09	<p>Lecturer: Assoc. Prof. Kotsilkov Periodontitis: - Classification. - Staging and grading of periodontitis. - Morphology of the alveolar bone loss. - Morphology of the intrabony defects.</p>
14.10	<p>Lecturer: Assoc. Prof. Bolyarova Contemporary alternative methods in the diagnosis of periodontal diseases. Risk factors for development of periodontitis – local (natural and iatrogenic plaque-retentive factors), systemic (general diseases and conditions). Patient behavior and compliance in treatment.</p>
28.10	<p>Lecturer: Assoc. Prof. Bolyarova Periodontal treatment planning. Phases of periodontal treatment. Prognosis of teeth in relation to periodontal status. Prognostic factors for periodontitis. Assessment the risk of periodontal disease progression.</p>
11.11	<p>Lecturer: Assoc. Prof. Mlachkova Initial cause-related periodontal therapy: - Concept, clinical protocol. - Treatment approaches (scaling and root planing – SRP). - Elimination (control) of local retentive factors. - Effectiveness of manual and mechanical debridement.</p>
25.11	<p>Lecturer: Assoc. Prof. Mlachkova Healing after nonsurgical periodontal therapy: - Effectiveness on microbiota. - Effectiveness on gingival inflammation. - Effectiveness on pocket activity. - Pocket reduction. - Gain of attachment. - Alveolar bone healing.</p>
09.12	<p>Lecturer: Prof. Popova Antimicrobial periodontal therapy: - Contemporary conception. Limits. - Additional systemic antibiotic therapy of periodontitis. - Agents.</p>
23.12	<p>Lecturer: Prof. Popova Antimicrobial periodontal therapy: - Antimicrobial therapy of periodontal pocket (topical antimicrobial therapy). - Decisions for additional antimicrobial therapy of periodontal pocket. - Agents. - Healing strategies related to host modulating response.</p>

Academic affairs assistant:

/Assist. Prof. Dr. Emilov/

Head of Department:

/Assoc. Prof. Dr. A. Mlachkova, MD/
