11. Does the internship experience contribute to your professional competence development?

Копиране

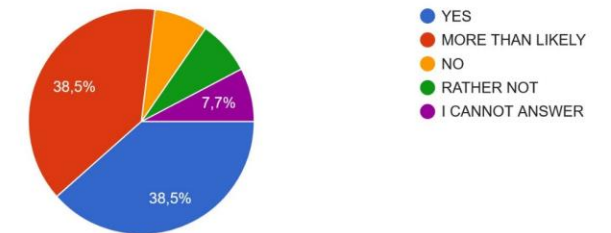

13 отговора

12. Will the acquired knowledge and skills help you for successful start up in your own practice?

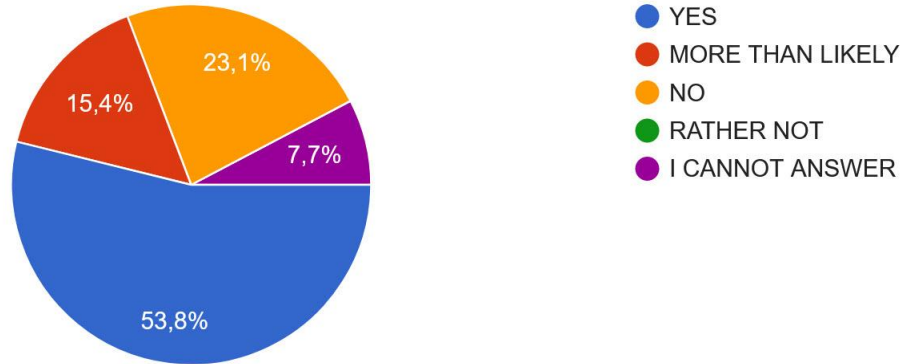

Копиране

13 отговора

13. Does the internship provide the progress of your knowledge, skills and competencies?

13 отговора

WHAT DO YOU LIKE ABOUT THE 6TH YEAR INTERNSHIP?.....

13 отговора

The clinical environment and the cooperation with the assistants
 Disrespectful , and they don't want to teach anymore
 The nurses are very helpful as well as the organisation of the daily program
 That its only clinical work like in real life, and not theoretical seminars again.
 The professors baby you less and help youwork more independently
 The assistants are very helpful and kind.
 I like that it is not as intensive work as 5th year in this way we can take a breath and also enjoy dentistry rather than being afraid of meeting requirements and patient cancellations . I also like the fact that the clinics include perio prsth and conservative which makes us more flexible in appointments. The doctors have been nothing but amazing to me (from personal experience) as well as the nurses. Everyone is very helpful and considerate.)
 The nurses
 We work a lot like if we have our own practice
 It is a good experience
 in 6th year the schedule is more flexible, and I have more time for my personal study
 Each one is recognized as a 6th year undergraduate and respected by the supervisors
 I like that we have to treat complex cases .

WHAT COULD BE IMPROVED?.....

13 отговора

Additional endo motors and equipment improvement
 More respect to students and to the students skills
 Availability of more assistants as it's extremely hard and time consuming to find one during work to check the patient. Sometimes even I couldn't work at all as there wasn't any assistant at all in the specialty which I needed. Also more freedom should be given to the 6th year students in applying local anaesthesia especially when there is no contraindications for the patient and they demand it. Finally as students respect doctors, doctors should respect the students as well because at the end of the day we are all humans. Respect shouldn't be gained by threatening but by just common sense.
 Not enough assistants and not sufficient amount of endo-motors.
 Sometimes 1 conservatives professor for 3 rooms, takes a while for them to check work
 More supervisor for the amount of students so that we can work faster. More materials there were cases where we run out of materials like prosthetic materials, impression materials. More chairs would allow us to have more time because patients are circumstances are unpredictable and we might lose our time. The people who work 4 o'clock have less assistants . I would like to be able to send impressions to private technicians outside the university because they are faster and it causing us stress to think that we might lose the requirements because the technician didn't bring it on time apart from the fact that we might lose time because of lack of materials for the prosthetic dentistry. Lastly finding appropriate patients is really difficult so being provided with patients is very important or at least receiving some help in that regard would be very helpful.
 More supervisors on shift are needed in order to be able to work properly and not wait for a very long time till each student's turn comes. 1 endo motor is not enough for 10+ students per shift which made me buy my own endomotor, at the moment we have no metal or ceramic or acrylic in the faculty which made me cancel 2 patients after I promised them treatment... and at that moment I had these patients but what if in the future I dont and it wasn't my fault that I couldn't work? But other than that everything has been amazing so far I only say honestly the comments to help in the future making our uni reach perfection in all aspects :D
 The times are not fair. We should change the times so everyone has the same chances with bringing patients.
 Availability of materials and more hours to work
 Too many requirements in less time. not enough time for professors to assist or check every studentj, due to this there is alot of waiting around
 the assistant doctors that are my supervisors, it will be better to speak english, so i can understand all the necessary details that are required
 time management
 More chairs

PLEASE, ADD YOUR COMMENT.....
